Amec Foster Wheeler awarded Heat Recovery Steam Generators contract from Iberdrola in Mexico

Summary

- Design and supply of Heat Recovery Steam Generators
- Iberdrola Generación México, S.A de C.V. Noreste combined cycle power plant

Amec Foster Wheeler announces today the award of a third contract in as many months by Iberdrola Generación México, S.A de C.V. for the design and supply of two Heat Recovery Steam Generators (HRSGs) in Mexico.

Amec Foster Wheeler will design, supply and provide commissioning and start-up assistance for two HRSGs at the Noreste combined cycle power plant in Escobedo, Nuevo Leon, Mexico. The units will be installed on Mitsubishi M501J gas turbines.

The HRSGs will recover exhaust 'waste' heat from the gas turbines to generate steam for process and additional power, thereby improving the overall plant efficiency without increasing the fuel consumption. The plant will be operational in 2017.

“

Amec Foster Wheeler is committed to working in the Latin American market offering our clients competitive pricing with value added technology, services and capabilities. We are pleased that Iberdrola has again recognised Amec Foster Wheeler as a market leader in the supply of HRSGs.

Gary Nedelka, Group President of Amec Foster Wheeler's Global Power Group

”

Iberdrola is the largest private power generator in Mexico with capacity of more than 5,300 Megawatts. Comision Federal de Electricidad awarded Iberdrola the contract for this additional 850 MW combined cycle power plant in Escobedo to supply electricity in north-eastern Mexico.

Notes to editors

Amec Foster Wheeler (www.amecfw.com) designs, delivers and maintains strategic and complex assets for its customers across the global energy and related sectors.

With pro-forma 2014 annualised scope revenues of £5.5 billion and over 40,000 people in more than 55 countries, the company operates across the whole of the oil and gas industry – from production through to refining, processing and distribution of derivative products – and in the mining, clean energy, power generation, pharma, environment and infrastructure markets.

With over 450 Amec Foster Wheeler HRSGs in the field today with millions of operational hours, we have developed a track record of reliable operation and high customer satisfaction for a wide range of combustion turbines.

We offer HRSGs for all applications ranging from large utility combined cycle power plants to small cogeneration and industrial facilities. We also provide a broad range of after-market services to solve problems and improve performance and reliability.

Amec Foster Wheeler shares are publicly traded on the London Stock Exchange and its American Depositary Shares are traded on the New York Stock Exchange. Both trade under the ticker AMFW.

Forward-Looking Statements

This announcement contains statements which constitute “forward-looking statements”. Forward-looking statements include any statements related to the timing and success of contracts, and are generally identified by words such as “believe,” “expect,” “anticipate,” “intend,” “estimate,” “will,” “may,” “continue,” “should” and other similar expressions. Forward-looking statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Amec Foster Wheeler, that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking statements.

Amec Foster Wheeler does not undertake to update any of the forward-looking statements after this date to conform such statements to actual results, to reflect the occurrence of anticipated results or otherwise.
