AMERICAN ENERGY CORPORATION HIRING LEVELS

American Energy Corporation (“American Energy”), which has directly employed six hundred fifty (650) families in the State of Ohio, regrets to announce that, due to the increased utilization of natural gas to generate electricity in the Ohio Valley area, and the ongoing destruction of the United States coal industry by President Barack Obama, it has been forced to make some workforce reductions. Specifically, American Energy must lay off ninety-eight (98) hourly and ten (10) salaried positions, effective immediately.

American Energy’s Century Mine will continue to employ five hundred forty-two (542) individuals. These remain some of the highest paying and best benefitted jobs available in our communities.

Any questions should be directed to media@coalsource.com.
