

# Chinook Power Station Project: Public Comments Invited

October 19, 2016 — Ottawa — Canadian Environmental Assessment Agency

The Canadian Environmental Assessment Agency must decide whether a federal environmental assessment is required for the proposed [Chinook Power Station Project](#), located approximately 11 kilometres northwest of Swift Current, Saskatchewan.

To help inform this decision, the Agency is seeking comments from the public on the project and its potential effects on the environment, as described in the [summary of the project description](#). All comments received will be considered public.

As a next step, the Agency will post a decision on its website stating whether an environmental assessment is required. If one is required, the public will have three more opportunities to comment on the project.

Written comments must be submitted **by November 8, 2016** to:

Chinook Power Station Project  
Canadian Environmental Assessment Agency  
Canada Place  
9700 Jasper Avenue, Suite 1145  
Edmonton, Alberta T5J 4C3
