

## **Coalview Announces Commissioning of Centralia Plant**

December 29, 2014 06:00 AM Eastern Standard Time

CORAL GABLES, Fla.--([BUSINESS WIRE](#))--[Coalview Ltd., LLC](#) (“Coalview”) America's leading fully integrated coal technology and fine coal recovery company providing technology and environmental solutions for mining property owners, is pleased to announce that it is successfully commissioning its Coalview Centralia fine coal recovery (FCR) plant. Full commissioning is on schedule, and the plant has experienced regular slurry and coal processing since the first week of December.

“We are pleased with the progress our team has made at Centralia,” stated Roger Fish, CEO of Coalview. “As we continue to scale up and fine tune the plant, we expect to demonstrate the plant will meet its production estimates as forecasted.”

The Coalview Centralia plant is a \$42 million investment for the company to provide the cleaning and evacuation of more than 18 million tons of slurry material, stored in the impoundment structures at the Centralia Coal Mine. Upon completion of slurry processing, a large scale environmental program will commence allowing the post-mining land use to include upland forestry, lowland forest (wetland, riparian, fish and wildlife habitat), pastureland, and industrial land.

The Centralia plant produces fine coal 24 hours a day, 7 days a week, and currently employs 23 people.

### **About Coalview Ltd.**

Coalview is America's leading fully integrated coal technology and fine coal recovery company providing technology and environmental solutions for mining property owners on a global basis. The company specializes in the application of technologies that allow for the removal and processing of waste materials, and is

the only company with a sample extraction technique, an in-house laboratory, plant design, and operating techniques to handle entire projects from start to finish. To learn more about Coalview Ltd., please visit [www.coalview.com](http://www.coalview.com).
