Re: Second Six Month Report for the Mona North Pumped Storage Project; Updated Contact and Service List Information (FERC No. 14239)

Dear Ms. Bose:

This letter is submitted in compliance with Article 4 of the preliminary permit for the above referenced project. The following constitutes Mona North Pumped Storage, LLC's ("Mona North") second six-month progress report. In addition, Mona North provides a change in the contact for the official service list for this project below.

Over the past six months, and indeed since the Federal Energy Regulatory Commission's ("Commission") issuance of a preliminary permit for this site on February 24, 2012, Mona North has been primarily focused on analyzing the economic feasibility of this site for development of a pumped storage project. Mona North continues to develop financial models to assist it in evaluating economic feasibility, particularly in comparison to other sites and market alternatives. Over the next six months, Mona North intends to continue to conduct market assessments and economic feasibility modeling with the goal of determining whether to pursue development of this site.

Mona North is aware that, should it decide to pursue development of this site, it must soon commence the pre-filing consultation process, development of a pre-application document, and associated study work. Mona North is approaching its internal assessments accordingly.

A Mona North contact for this project has changed. Please retain Cherise Oram as Counsel of Record, but please remove Nathan Sandvig from the service list and substitute the following two contacts:

Gregory Probst
