Dominion Transmission, Inc.

Docket No. CP14-555-000

NOTICE OF AVAILABILITY OF THE
ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED
LEBANON WEST II PROJECT

(June 2, 2015)

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Lebanon West II Project, proposed by Dominion Transmission, Inc. (Dominion) in the above-referenced docket. Dominion requests authorization to replace 11 non-contiguous segments of its 26- and 30-inch-diameter TL-400 Pipeline totaling about 10.2 miles, add a 10,915-horsepower compressor unit to an existing compressor station, and install other compressor station and gate assembly facilities. Dominion also proposes to increase the maximum allowable operating pressure (MAOP) of these pipeline segments from 745 pounds per square inch gauge (psig) to 848 psig. The project would allow Dominion to transport an additional 130,000 dekatherms per day from Dominion's MarkWest Liberty Bluestone Interconnect in Butler County, Pennsylvania to Dominion's Lebanon-Texas Gas Interconnect in Warren County, Ohio.

The EA assesses the potential environmental effects of the activities associated with the project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; Native American tribes; potentially affected landowners; newspapers and libraries in the project area; and parties to this proceeding. In addition, the EA is available for public viewing on the FERC's website (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at:
