RE: Overdue Progress Report

Dear Mr. Smith:

Article 4 of the preliminary permit¹ for the above referenced project requires submittal of a progress report every six months. According to our records, the first progress report due March 1, 2013, has not been filed.

The failure to timely file the first progress report warrants the cancellation of the preliminary permit. This letter constitutes notice under section 5 of the Federal Power Act of the probable cancellation of the preliminary permit no less than 30 days from the date of this letter. If you have any questions, please contact Mary Greene at (202) 502-8865 or Mary.Greene@ferc.gov.

Sincerely,

Timothy J. Welch, Chief
West Branch
Division of Hydropower Licensing
