

# Fluor Completes Dominion's Brunswick County Power Station

May 23, 2016 04:17 PM Eastern Daylight Time

IRVING, Texas--(BUSINESS WIRE)--[Fluor Corporation](#) (NYSE: FLR) announced today that it has achieved substantial completion for Dominion Virginia Power's (NYSE: D) Brunswick County (Va.) Power Station.

Fluor provided engineering, procurement, construction and commissioning services for the 1,358-megawatt natural gas-fueled power station in Brunswick County, Virginia. Fluor completed the project with a construction staff totaling more than 1,500 workers during the peak of construction activity.

The completed power station will produce enough electricity to power 325,000 homes and began producing electricity for its customers in April.

"The completion of the Brunswick County facility is a prime example of Fluor's service excellence we provide to our clients," said [Chris Tye](#), president of Fluor's Power business. "We are especially proud of the project team that demonstrated our ability to achieve quality completion ahead of schedule. Building upon our long and proven track record with Dominion, Fluor again delivered an asset that supports their pursuit to provide customers with clean and reliable energy."

Fluor is also scheduled to begin construction on Dominion's new Greensville County Power Station later this year, a 1,600-megawatt combined-cycle, natural gas-fired power station in Greensville County, located seven miles from the Brunswick County Power Station.
