Washington, DC 20426

Re: Great Western Wind Energy, LLC, Docket No. ER16-2360-000

Dear Secretary Bose:

On August 2, 2016, Great Western Wind Energy, LLC (“Great Western”) filed a petition for authorization to make sales under a market-based rate tariff in the above docket (the “Petition”). At the request of the Commission staff, Great Western provides the following information about the intermediate holding companies in its ownership chain between Great Western and EDF Renewable Energy, Inc. (“EDF-RE”): Great Western is directly wholly owned by EDF-RE US Development, LLC, which is owned 95 percent by EDF Renewable Development Inc., and 5 percent by EDF Renewable Asset Holdings, Inc. Both EDF Renewable Development, Inc., and EDF Renewable Asset Holdings, Inc., are wholly owned by EDF-RE.

Further, Great Western relied on the study approved in *Roswell Solar, LLC*, Docket No. ER16-1440-001 (July 16, 2016) (unpublished letter order) since that was the most recently approved study at the time Great Western filed its Petition. If more recent information had been used for the screen analysis Great Western has no reason to expect that the outcome would be different since it easily passed the Commission’s pivotal supplier and market share screens.

To the extent it is necessary to provide for public notice and comment on this submission, Great Western requests a shortened notice period for this information because it does not substantively change the information provided in the Petition. In all events, Great Western continues to request the Commission to permit its market-based rate tariff to be effective as proposed on October 1, 2016.
