SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is making available final Supplement 56 to NUREG-1437, regarding the renewal of DTE operating license NPF-43 for an additional 20 years of operation for Fermi 2. Draft Supplement 56 to NUREG-1437 was published in the *Federal Register* on November 6, 2015 (80 FR 68881), and published in the *Federal Register* by the Environmental Protection Agency on November 13, 2015 (80 FR 70206). The public comment period on draft Supplement 56 to NUREG-1437 ended on December 28, 2015, and the comments received are addressed in final Supplement 56 to NUREG-1437.

II. Discussion

As discussed in Chapter 5 of the final Supplement 56 to NUREG-1437, the NRC staff determined that the adverse environmental impacts of license renewal for Fermi 2 are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) the analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by DTE; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 21 day of September, 2016.

For the Nuclear Regulatory Commission.

Kevin T. Folk, Acting Chief,
Environmental Review and Projects Branch,

Division of License Renewal,
Office of Nuclear Reactor Regulation.
