Email: ShawnLemond@secdc.net

3. Nature of the generating facility including the type and source of its power or fuel

The generating facility will be one 7.5 MW (AC) photovoltaic array. The source of its power is solar energy.

4. Address or location of generating facility set forth in terms of local highways, streets, river, streams, or other generally known landmarks together with a map such as a county road map with the location indicated on the map.

SECDC, LLC
NC PIN # 4607397624
5130 NC 121
Farmville, NC 27828 (see Exhibit A)

(i) Proposed layout

- (ii) All major equipment, including the generator, fuel handling equipment, plant distribution system, and startup equipment:

Inverters: *Schneider gt500-mvx, 500kw each
Panels: *Bosch C-SI m60, 290w each and
Racking: *Daetwyler Modu-Rack, 25 degree tilt

*or equivalent

- (iii) The site boundary:

Site boundary is identified by black line in layout above.

- (iv) Planned and existing pipelines, planned and existing roads, planned and existing water supplies, and planned and existing electric facilities:

- No existing or planned pipelines
- No existing or planned roads on site, however a gravel entrance will be provided at the north end of the site.
- No existing or planned water supplies on site, other than drainage ditches
- There are no existing electric facilities on site but a 7.5 mw-ac solar facility will be built on site per above layout

5. Owner of site, if the owner is not the applicant, and the owner's interest in the site or relation to application

Owner of site- City of Farmville. Applicant is leasing the site from the landowners and applicant will own 100% of the generating facility.

6. A description of the buildings, structures and equipment comprising the generating facility and the manner of their operation

The facility is a fixed tilt, ground mounted solar photovoltaic system consisting of approximately 30,000 PV modules and will utilize fifteen (15) 500kW inverters. The entire project will be fenced.

7. The projected maximum dependable capacity of facility in megawatts

Solar is an intermittent energy source, the maximum dependable capacity is 0 MW.

8. The projected cost of the facility

The projected cost is approximately \$24.00 MM.

9. The projected date on which the facility will come on line:

The facility is expected to be energized in phases as available with the complete system on line by 12/31/2013.

10. The applicant's general plan for sale of the electricity to be generated, including the utility to which the applicant plans to sell the electricity, any provisions for wheeling of the electricity, arrangements for firm, non-firm or emergency generation, the service life of the project, and the projected annual sales in kilowatt hours.

The applicant plans to sell the electricity to North Carolina Eastern Municipal Power Agency under a 15 year Power Purchase Agreement subject to the rate schedule EQF-2. The projected lifetime of the equipment is twenty years. The projected annual sales of electricity from this facility is approximately 22,500 MWh. The applicant intends to produce renewable energy certificates that can be used to comply with North Carolina's Renewable Energy Portfolio Standard

11. A complete list of all federal and state licenses, permits and exemptions required for construction and operation of the generating facility and a statement of whether each has been obtained or applied for. A copy of those that have been obtained should be filed with the application; a copy of those that have not been obtained at the time of the application should be filed with the Commission as soon as they are obtained.

The applicant plans to file for or is in the process of applying for the following:

- Self-certification as a Qualifying Facility with the Federal Energy Regulatory Commission.
