

II. DESCRIPTION OF APPLICANT

Tyler Bluff is a limited liability company organized under the laws of the State of Delaware, with its principal place of business in Cooke County, Texas. It is indirectly wholly-owned by EDF Renewable Energy, Inc. (“EDF-RE”). Tyler Bluff is developing and will own and operate the Facility, to be located in Cooke County, Texas.

The Facility will consist of wind turbines and related facilities necessary to interconnect to the transmission system operated by the Electricity Reliability Council of Texas (“ERCOT”). All of the output of the Facility will be sold exclusively at wholesale.

EDF-RE develops, builds, operates and manages renewable energy projects throughout North America. EDF-RE is wholly owned by EDF Energies Nouvelles S.A., a French société anonyme, a company organized under the laws of France, which in turn is wholly owned by Électricité de France, S.A. (“EDF SA”), which is owned by the French government (84.49%), with a small percentage of shares held by the employees (approx. 1.80%) and the remaining shares owned by the public.

III. SELF-CERTIFICATION OF EWG STATUS

Consistent with the Commission’s regulations, Tyler Bluff makes the following representations in order to demonstrate that it meets the Commission’s definition of an EWG under Section 366.1 of the Commission’s regulations³ for its energy sales from the Facility.

1. Tyler Bluff will be engaged directly and exclusively in the business of owning or operating, or both owning and operating, all or part of one or more “eligible facilities” and selling electric energy at wholesale, and the Facility will satisfy the definition of an “eligible facility” because it will be used for the generation of electric energy exclusively for sale at wholesale.
2. Tyler Bluff will not own any transmission facilities other than those interconnection facilities that are necessary to effect the wholesale sale of electric

³ 18 C.F.R. § 366.1 (2015).

energy from the Facility, consistent with Commission precedent construing the definition of “eligible facility” under Section 32(a)(2) of the Public Utility Holding Company Act of 1935 (“PUHCA 1935”).

3. No rate or charge for, or in connection with, the construction of the Facility, or for electric energy produced thereby, was in effect under the laws of any State on October 24, 1992. Accordingly, no State determination is required with respect to this filing.

4. There are no lease arrangements through which Tyler Bluff will lease the Facility to a public utility company or any other party.

5. Tyler Bluff does not sell electricity at retail to any customer. Accordingly, the Facility does not rely on the exception provided by Section 32(b) of PUHCA 1935 regarding foreign sales of power at retail.

6. No portion of the Facility will be owned or operated by an “electric utility company” that is an “affiliate” or “associate company” of Tyler Bluff.

In accordance with Section 366.7(a) of the Commission’s regulations, a copy of this Notice is concurrently being served upon the Public Utility Commission of Texas.

IV. CONCLUSION

For the foregoing reasons, Tyler Bluff respectfully requests that the Commission accept this Notice of Self-Certification of EWG Status.

Respectfully submitted,

/s Andrea Wolfman
